PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive, user-centered web interfaces using HTML, CSS, and JavaScript. Built and deployed three AI-powered web applications — an AI GitHub Analyzer, a Drag-and-Drop Website Builder, and an AI Job Cracker — demonstrating strong UI architecture and product thinking. Experienced with Figma for design-to-code workflows and Vercel for deployment. Currently deepening expertise in React.js and modern full-stack development.

TECHNICAL SKILLS

Languages & Technologies: HTML5, CSS3, JavaScript (ES6+), React.js (in progress)

Design & Dev Tools: Figma, Relume, VS Code, Git, GitHub, Vercel

AI-Assisted Workflow: ChatGPT, Claude, GitHub Copilot — used for ideation, debugging, and accelerating UI development

Core Competencies: Responsive Design, UI/UX Principles, Component Architecture, Cross-browser Compatibility, Performance Optimization

PROJECTS

AI Job Cracker UI [Live](#) | [Github](#)

HTML • CSS • JavaScript • Vercel

- Developed a structured interview preparation interface organizing questions, topics, and learning paths by role and difficulty level for targeted practice.
- Designed a clean content hierarchy with clear navigation patterns, making it easy for users to track progress across multiple interview categories.
- Built fully responsive layouts optimized for both desktop study sessions and mobile quick-review, ensuring accessibility across use cases.

Drag & Drop Builder UI [Live](#) | [Github](#)

HTML • CSS • JavaScript • Vercel

- Designed and built a real-time drag-and-drop interface allowing users to place and arrange text, image, and component blocks without writing code.
- Engineered the canvas layout system to support flexible element positioning, resize handles, and snap-to-grid behavior for an intuitive building experience.
- Reduced complexity of web creation for non-technical users by abstracting layout logic into a visual-first workflow with instant feedback.

AI GitHub Analyzer UI [Live](#) | [Github](#)

HTML • CSS • JavaScript • Vercel

- Built a responsive dashboard UI to visualize GitHub profile data — repositories, activity, and skills — with a structured information hierarchy for fast scanning.
- Implemented AI-based profile analysis flow with clear visual states for loading, results, and errors, improving perceived performance and usability.
- Deployed on Vercel with optimized asset loading, achieving clean navigation and a smooth single-page experience across devices.

EDUCATION

Bharathi College (Autonomous)

Bachelor of Computer Applications | 2023 – 2026
